

SMITH METAL ARTS

SINCE 1889

***American manufacturer and retailer of office accessories,
desk pads, and wastebaskets.***

Why Choose Us

Two names, linked together for decades, represent the finest collections of traditional desk accessories available. Handcrafted in the USA since the late 1800s, our desk accessories are fabricated from fine metals such as stainless steel, aluminum, brass and bronze--in a choice of finishes--as well as luxurious full-grain leather.

Our Collections

We have several collections to choose from, each with a distinct style available in a variety of finishes. Our designs range from art deco to traditional to contemporary and will enhance any office setting, from the front desk to the boardroom.

Within each collection, we offer essentials such as desk pads, letter trays, pen bases, pencil cups, memo trays, business card holders, clip cups, library sets and bookends—everything expected in a nicely-appointed office space—right down to the engraved name plate. We invite you to take a look at some of our collections.

Executive Leather

Clean, crisp, rectilinear lines are the highlight of the Executive Leather Collection. In this case, exceptional detail and expert craftsmanship are combined with the tactile and visual appeal of genuine leather to produce the Executive Leather Collection of desk accessories.

Handcrafted of the highest quality full grain upholstery leather, these hand-wrapped accessories are available in the leather colors shown herein, and work particularly well in a traditional office environment.

Eclipse Metal

The Eclipse Metal Collection is comprised of a wide range of accessories, each of which features subtly radiused corner details. Its crisp architectural details lend themselves particularly well to contemporary office settings.

Radius One Metal

The award-winning Radius One Metal Collection is a classic collection with universal appeal. Its unique curvilinear expression has been highly recognized as a handsome statement of contemporary design, rendering it the ideal accompaniment to today's contemporary office setting. Beautifully sculpted in fine metals, the careful attention to detail is a hallmark of the craftsmen who interpret this original classic.

Desk Pads

Desk pads are our specialty. They are available in linoleum, clear acrylic, vinyl and leather. We offer standard shapes and sizes, but are happy to make custom sizes, too. We make pads for desks, individual seating around a conference table, or to cover an entire conference table for complete protection. Personalization, such as a company logo, can be embossed on most desk pads, conference pads and coasters.

Custom Products

We make the majority of our products to order, so customizations and changes to our standard products are easily and regularly dealt with.

For a small surcharge, company logos or personal initials can be foil, blind, or heat embossed onto the majority of our standard leathers.

Please contact us for your next custom order.
